DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to an optical system, classified in class 385, subclass 132.
 - II. Claims 12-22, drawn to a method of forming an optical system by depositing and diffusing ions, classified in class 216, subclass 24.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the waveguide can be made by using different process such cutting or perforating hole into the substrate for forming the channel without using ionic liquid or similar applications.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. Ian Hardcastle on 1/27/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
